

Eyeline® Rollfix in-ceiling recess frame

Convert your Rollfix screens into a discreet in-ceiling projection screen through the use of a recess frame

- Designed for use in rooms with suspended ceilings and where the case need to be hidden from view or where wall mounting is not a suitable option
- The recess frame has a white sleek case design that protects the screen and remains almost completely hidden from view when not in use
- Perfect for a professional and discreet installation, ideal for boardroom and hospitality installations

Simple 3 step guide for in-ceiling conversion

- 1

Select recess frame designed for use with the width of your selected Rollfix screen (see previous page).
- 2

Recess frame is installed into your suspended ceiling
- 3

Mount your screen within the recess framework and complete electrical installation

For use with Screen Code	Recess frame size (NB NOT hole size)		Recess Frame only, for use with Rollfix screens
	Length	Depth	
RFV180	2186mm	140mm	CR180
RFV200	2386mm	140mm	CR200
RFV240	2786mm	140mm	CR240
