

Eyeline® Rear Projection electric screens

Becoming more popular each year, rear projection screens are used in environments where the projection source is sited behind the screen in order to save space or create a clear environment for the viewing audience.

2 year guarantee.

Projection format

Available in Video 4:3, Widescreen 16:9 & 16:10 Formats.

Screen material & borders

Rear projection coral screen material. 4:3 format screens are available with or without black borders. The 4:3 with black borders and 16:9 formats also have an extended black drop.

Operation

Electrically operated, supplied with a wall switch as standard. Remote operation using Radio Frequency or Infra Red signal is available as optional extras.

Installation

White powder coated aluminium case with a robust channel fix mounting system for fast, secure installations to a wall or ceiling. Motor is situated on the left hand side. Requires electrical installation.

Need a different size or material?

Different screen size, format or fabric – Please contact us for our extended range and details of our Made to Order screens.
