

NEW Quatro premier literature stands

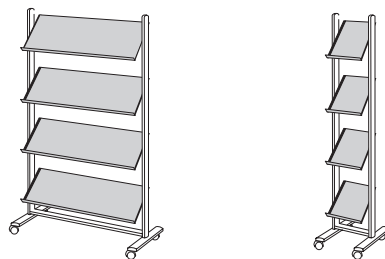

Premier leaflet display with adjustable steel or transparent acrylic shelves

The attractive new design enables the shelves to be independently set at 15°, 45° or 90° during assembly; to suit your presentation requirements. Locking castors are standard. These contemporary leaflet dispensers are designed and manufactured to a high standard. Available in 4 x A4 or 12 x A4 models. As there are no dividers or separators the shelves can accommodate virtually any style of leaflet or brochure. Satin anodised aluminium framework is complimented with either powder coated steel shelves or transparent acrylic shelves. Supplied with 4 castors for mobility.
